

Forest EDGE Tool Instructions: Infrastructure Explorer

(This application is not formatted for use on mobile devices.)

Infrastructure Explorer allows you to explore demographic and market access information, regional infrastructure, and business support for investment assistance across Ontario.

1. **Zone Selection:** To begin, select an area that you're interested in from the zone selector in the upper right corner of the app window. Once a zone is selected, the map will focus on a 200 km zone surrounding the area of interest. (Note: hovering over the map and scrolling up or down, will zoom in or out and you can drag the map with your mouse to display the area you're interested in.)
2. **On the left side of the map,** you will see four boxes containing the following information: population, border crossings, seaports, and airports. These values will change as you zoom in and out of the map based on the area searched.

Clicking any of the map icons directly will open a pop-up with more detailed information about that feature.

3. **On the right side of the map,** you will see a series of scrollable boxes containing the following information for the selected zone: the Indigenous Communities and forest management units, the forest processing facilities, business support agencies, and printable demographics.

Clicking any of the map icons directly will open a pop-up with more detailed information about that feature.
